

A hand holding a red-handled roller is painting a wall with white paint. The wall is partially covered with a textured white plaster. To the left, there are three rectangular color swatches in shades of orange, yellow, and red. The background is a light-colored wall with a subtle texture.

All the stated color tones may be supplied ready-mixed. For self-mixing, please contact our homepage for non-binding formulations given for AGLAIA **RESIN WALL PAINT**. Product descriptions and application advices are given in our Technical Information Sheets.

For pricing of categories I – III and available sizes please refer to the current AGLAIA Delivery Programme.

Based on more than 110 years of experience in applying BEECK Mineral Paints in restoration and modern room design, a delicate color range of individual nuances originated. Historic colors are still perceived as ageless esthetical harmony of architecture and coloring. Pure mineral pigments provide an absolutely non-fading earthy bright-ness, far from the placative coloring of organic-synthetic dyes.

For more than 30 years, AGLAIA supplies genuine plant based natural paints, exclusively made from renewable raw materials like dammar resin, plant oils or casein.

This combination of environmentally-friendly building materials with colorful modern room design yields in a special healthy natural room climate.
